SHOP IN AMERICA

The scenes pictured here are from our New York shop, 745 Fifth Avenue—"The Largest Toy Shop in America". These are familiar glimpses to many thousands of F. A. O. SCHWARZ customers throughout the country, to whom Schwarz and Christmas are just about synonymous. We wish it were possible to show you more of this famous shop and to include representative views of our branch shops in Boston and Ardmore—but space doesn't permit.

CHRISTMAS SHOPPING ENDS DEC. 2nd

Just about as important a date this year as Christmas Day, December 25th, is December 2nd. That is the deadline beyond which we cannot accept catalogue orders for delivery before Christmas.

We have more of everything than we had last year—but not nearly enough to meet the requirements of America's Largest Toy Shop. We have a greater selection of new toys, of better toys, of typically F. A. O. SCHWARZ toys but not enough yet to meet increased customer demand.

So we must again ask you this year to do your Christmas Shopping early. The earlier you order, the better we can please you.

We cannot fill catalogue orders received after Monday, December 2nd.

IT'S FUN TO SHOP AT SCHWARZ

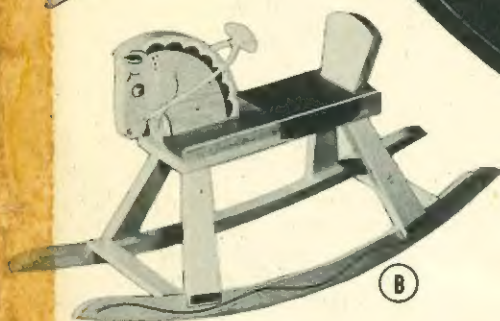

Every year since 1862, new customers are discovering, what generations of our old customers have long enjoyed—the pleasure of dealing with F. A. O. SCHWARZ. They find SCHWARZ prices fair and reasonable and SCHWARZ quality always reliable. They appreciate the prompt and courteous service SCHWARZ render. They buy with confidence in the SCHWARZ guarantee of satisfaction in every transaction.

A—11—36—Erector No. 8 1/2 Set—This is the all-electric set which builds the Bascule Bridge, Ferris Wheel, Magnetic Crane, etc. Set includes whistle, 110 volt reversing electric engine, lifting magnet, lights, miniature house, base plates and girders, etc., together with instruction book. Comes packed in 20 1/4 x 12 1/4 x 2 3/4" metal cabinet. Shipping weight 23 lbs. \$16.95

B—11—35—Model Power Plant—Of high educational value, this model power plant will show the transformation of heat into electric energy, that is, the boy engineer can trace how heat under the boiler eventually develops steam, thus running the engine, the engine in turn running the generator which eventually produces the electricity thus lighting the lamp! The whole unit consists of boiler, steam engine, generator and light post. Boiler 2 1/2" diameter x 5" long is made from heavy seamless brass tubing and mounted on a steel fire box. Accessories are safety valve, whistle, large water gauge glass, and electrical heating element for 110 volts A. C. or D. C. The double-acting engine has heavy cast iron fly-wheel and is controlled by a throttle valve. The entire unit mounted on a wooden base board measures 10 x 15", finished in black and blue enamel with nickel-plating. Height 8 1/2". So perfect in design many "Physics Professors" have used this plant for demonstration purposes. Shipping weight 14 lbs. \$38.95

C—10—40—Model Power Plant—Same fine quality and workmanship as model described above only it is smaller and its wooden base measures 9 1/2 x 15". Shipping weight 12 lbs. \$22.00

Steam Engines—Steam continues to be man's greatest source of power; its creation and use is always a fascination. The highly polished boilers in these steam plants are heated electrically from a hidden coil in the black metal base connected to the house current, and the water gauge and safety valve protect it, while a whistle and steam valve are extra gadgets. The steam valve controls the

flow of the steam to the pistons and flywheel and to the latter a belt may be attached for operating accessories.

D—10—39—Steam Engine—Designed like the model power plants it operates on 110 volts AC or DC current. The Boiler, 2 1/2" diameter x 5" long, mounted on steel fire box and the heavy cast iron flywheel are mounted on wooden base measuring 9 1/2 x 11 1/2". Shipping weight 7 lbs. \$16.00

E—10—37—Senior Steam Engine—Horizontal in design it operates on 110 volts AC or DC current. Has reciprocating engine with stationary cylinder and double acting slide valve and will run for 30 or 40 minutes. Boiler 3" in diameter has 22 oz. capacity and is cradled in a metal fire box. Overall size at base 6 1/4 x 9 1/2". Shipping weight 8 lbs. \$18.50

F—10—38—Master Steam Engine—Same as the Senior Steam Engine only larger, with double wheels and pistons. Boiler is 3 1/2" in diameter and has a 36 oz. capacity. Overall size at base, 7 1/2 x 11 1/2 inches. Shipping weight 11 lbs. \$25.00

G—9—37—Electronic Repeater Cannon—This electric cannon is rugged and sturdy and is simple to operate. Just plug the cannon into a wall socket, drop the shells in the clip, aim at the large colorful target and by touching the remote control switch the automatic, repeater action, fires nine harmless wooden shells—bing, bing, bing. Measures 16 inches overall. Shipping weight 4 lbs. . . . \$4.95

H—10—41—Marvel Phone Set—This all purpose utility phone set is an inexpensive method of establishing inter-communication in homes, offices, factories, farms, etc. Has excellent sound reproduction quality and is easily installed. Set consists of two black all-metal, cradle type phones, and 35' coil of double conductor line wire. All you need are two No. 6 dry cell batteries at each phone which will carry voice and signal up to 750'. For further distance add additional wire and batteries. Shipping weight 6 lbs. \$10.95
